

PSEG Institute for Sustainability Studies Presents

7th Annual Green Teams Summer Internship Program

May 31ST, 2022 - August 4TH, 2022

Green Teams Projects and Participation from 2016-2021:

- 6 Years
- 270 Students
- 55 Universities
- 100+ Majors
- 54 Teams
- 32 Hosting Organizations
- 108,000+ Hours
- 188 Projects

WHAT WOULD YOU DO?

Over ten weeks, students work with industry experts to achieve high-level deliverables and present a comprehensive and actionable written report in addition to a group TED-style presentation to their hosting organization.

Past Projects Conducted:

- Mapped street trees and evaluated carbon sequestration rates
- Integrated technology into agricultural environments
- Calculated scope 3 emissions
- Provided an analysis of stormwater management

WHO ARE WE?

The Green Teams Program is a **PAID** summer internship for undergraduate students hosted at the PSEG Institute for Sustainability Studies (PSEG ISS) at Montclair State University. PSEG ISS plays a transformative role in providing transdisciplinary research and education to address real-world sustainability issues. We believe building academic-corporate-public partnerships provides vital research and knowledge on how to produce feasible solutions for our collaborating organizations and beyond.

WHY THE GREEN TEAMS?

This fast-paced environment offers students of any background the opportunity to build professional networks, expand their skill sets, and gain hands-on experience in a professional setting. Students of diverse majors work in groups of 5 in collaboration with a hosting organization to help them address their sustainability challenges.
